SKILLS

React, Redux, JavaScript, HTML, CSS, SQL, PostgreSQL, Python, Flask, Express, Node.js, SQLAlchemy, Sequelize, Heroku

PROJECTS

Reddit Clone | Turtell (Flask, ReactJS)

[live](#) | [github](#)

A Reddit clone with a minimal / sharp UI design built with ReactJS, Redux, Flask, Heroku and PostgreSQL

- Developed a minimalistic, smooth and easy to use UI with dynamic components using React and Redux that allowed users to stay constantly updated as they navigated through the site.
- Integrated dark and light mode options using CSS classes and variables for ease of use and accessibility for users with high contrast preferences.
- Utilized Redux's powerful state management to create a dynamic search bar that autocompletes a user's query with matching elements in the database and allows them to find resources with ease.

Instagram Clone | Kilogram (Flask, ReactJS)

[live](#) | [github](#)

A pixel-perfect Instagram clone that utilizes ReactJS, Redux, Flask, AWS, Heroku and PostgreSQL

- Designed a pixel perfect layout that matches Instagram exactly to simulate the same intuitive layout and ease of access that Instagram offers.
- Incorporated AWS image hosting giving users the ability to upload images from any device's local image library.
- Implemented a notifications feature using a short poll that allows users to see other user's interactions dynamically.

Quora Clone | Muse (Express, Pugs)

[live](#) | [github](#)

A Quora clone with a vaporwave aesthetic that employs Pugs, Express, Node.js, Sequelize, Heroku and PostgreSQL

- Orchestrated a plan to create and design a Quora clone with a focus on questions centered around music and audio to give users interested in music a community that encourages interaction.
- Headed the design process using CSS and Pugs to create a visually pleasing website within a specific theme that boasts an intuitive layout and UX.

EXPERIENCE

Head Line Cook

Krazy Jim's Blimpy Burger

Mar 2017 - June 2021

- Coordinated with a team to handle 500+ orders a day; prepping, frying, cooking, dressing and taking orders.
- Worked as a position analogous title, handling both front of house duties and back of house, using experience to manage newer members of the team to achieve maximum profit for the store.

EDUCATION

Web Development - App Academy | Summer 2021

Bachelor of Fine Arts - Eastern Michigan University | 2016 - 2020
